Awards & Achievements

- Received the **Young Achiever Award** at **Candent Technologies** for consistent delivery and engineering excellence.
- Recognized by client stakeholders for leading frontend development and delivering critical fintech modules.

Professional Experience

Full Stack Software Developer, *Candent Technologies Pvt Ltd – Pune, IN*

Mar 2023 – Present

- Contributing to an enterprise cybersecurity platform using **Next.js** and **Python** to analyze infrastructure assets and detect cryptographic risks, working with **Azure DevOps** and **App Services**.
- Built an **AI-powered Scrum assistant** using **LLMs (Ollama)** and **Node.js** that automates standup meetings by collecting team updates and generates meaningful data. Integrated with **Teams** and **Discord**.
- Developed **Cbell**, a CMS-style platform using **React.js**, **.NET**, and **MongoDB** to manage dynamic content and configurations across organizations.
- Led frontend **design and development** for a **fintech banking client**, working with client stakeholders to gather **requirements** and deliver multiple UI modules and dashboards.
- Built internal tools including an **Appraisal Management System** (Next.js) and an **Event Management System**, handling both frontend and backend development.
- Built cross-platform mobile features using **React Native** and contributed to application deployments on platforms such as **Heroku** and **Netlify**.
- Contributed to **CI/CD pipelines**, **testing**, and **deployment workflows** to ensure stable releases and maintain production reliability.

Projects

Run2Feed Marathon Platform – *Next.js, Node.js, Docker, VPS, Easebuzz*

- Built a full-stack **marathon registration platform** for charity running events with event listings, sponsor showcases, and participant registration workflows.
- Integrated **Easebuzz payment gateway** and developed an **admin dashboard** to manage events, registrations, and participant data.
- Deployed a **Dockerized backend on VPS** with domain configuration, subdomains, and **CORS setup**, while optimizing **SEO and performance** for the public-facing website.

Ticketing System Web App – *React.js, TypeScript, Node.js, MongoDB*

- Built a **role-based ticketing platform** using **React.js** and **TypeScript** with reusable components and structured state management.
- Developed secure **REST APIs** using **Node.js** and **MongoDB** to handle authentication, ticket creation, assignment, and status workflows.

Modern Business Website – *Next.js, Tailwind CSS, TypeScript, Vercel*

- Developed and deployed a responsive website using **Next.js**, **Tailwind CSS**, and **TypeScript** with a custom domain on **Vercel**.
- Implemented secure form handling with **Zod validation**, **Cloudflare Turnstile CAPTCHA**, and achieved **90+ Lighthouse scores** for performance and SEO.
